Plug-in connector module

Claims

1. Plug-in connector module (1) with a shielding against interfering radiation,
10 for use in a module mounting device (40) of a plug-in connector casing
(50), characterized in
that an electrically conductive shell-type casing (20), with a connector in-
sert (30), is retained in a retaining body (10) composed of insulating mate-
rial, and in
15 that the retaining body (10), with the shell-type casing (20) and the con-
nector insert (30), can be locked in place in the module mounting device
(40), and in
that there is provided on the shell-type casing (20) a clip (28) by means of
which a signal line, leading to the connector insert (30), can be fastened,
20 the shielding braid of the signal line being contacted to the shell-type cas-
ing.
2. Plug-in connector module according to claim 1, characterized in
that the shell-type casing (20) can be locked together with the retaining
25 body (10).
3. Plug-in connector module according to claim 1 or 2, characterized in
that the connector insert (30) can be fastened in the shell-type casing (20).
- 30 4. Plug-in connector module according to one of the preceding claims, char-
acterized in
that the clip (28) can be fastened to an elongated side surface (22) of the
shell-type casing (20).
